

刀具, 配件 (钻头/起子) 部分柄部类型

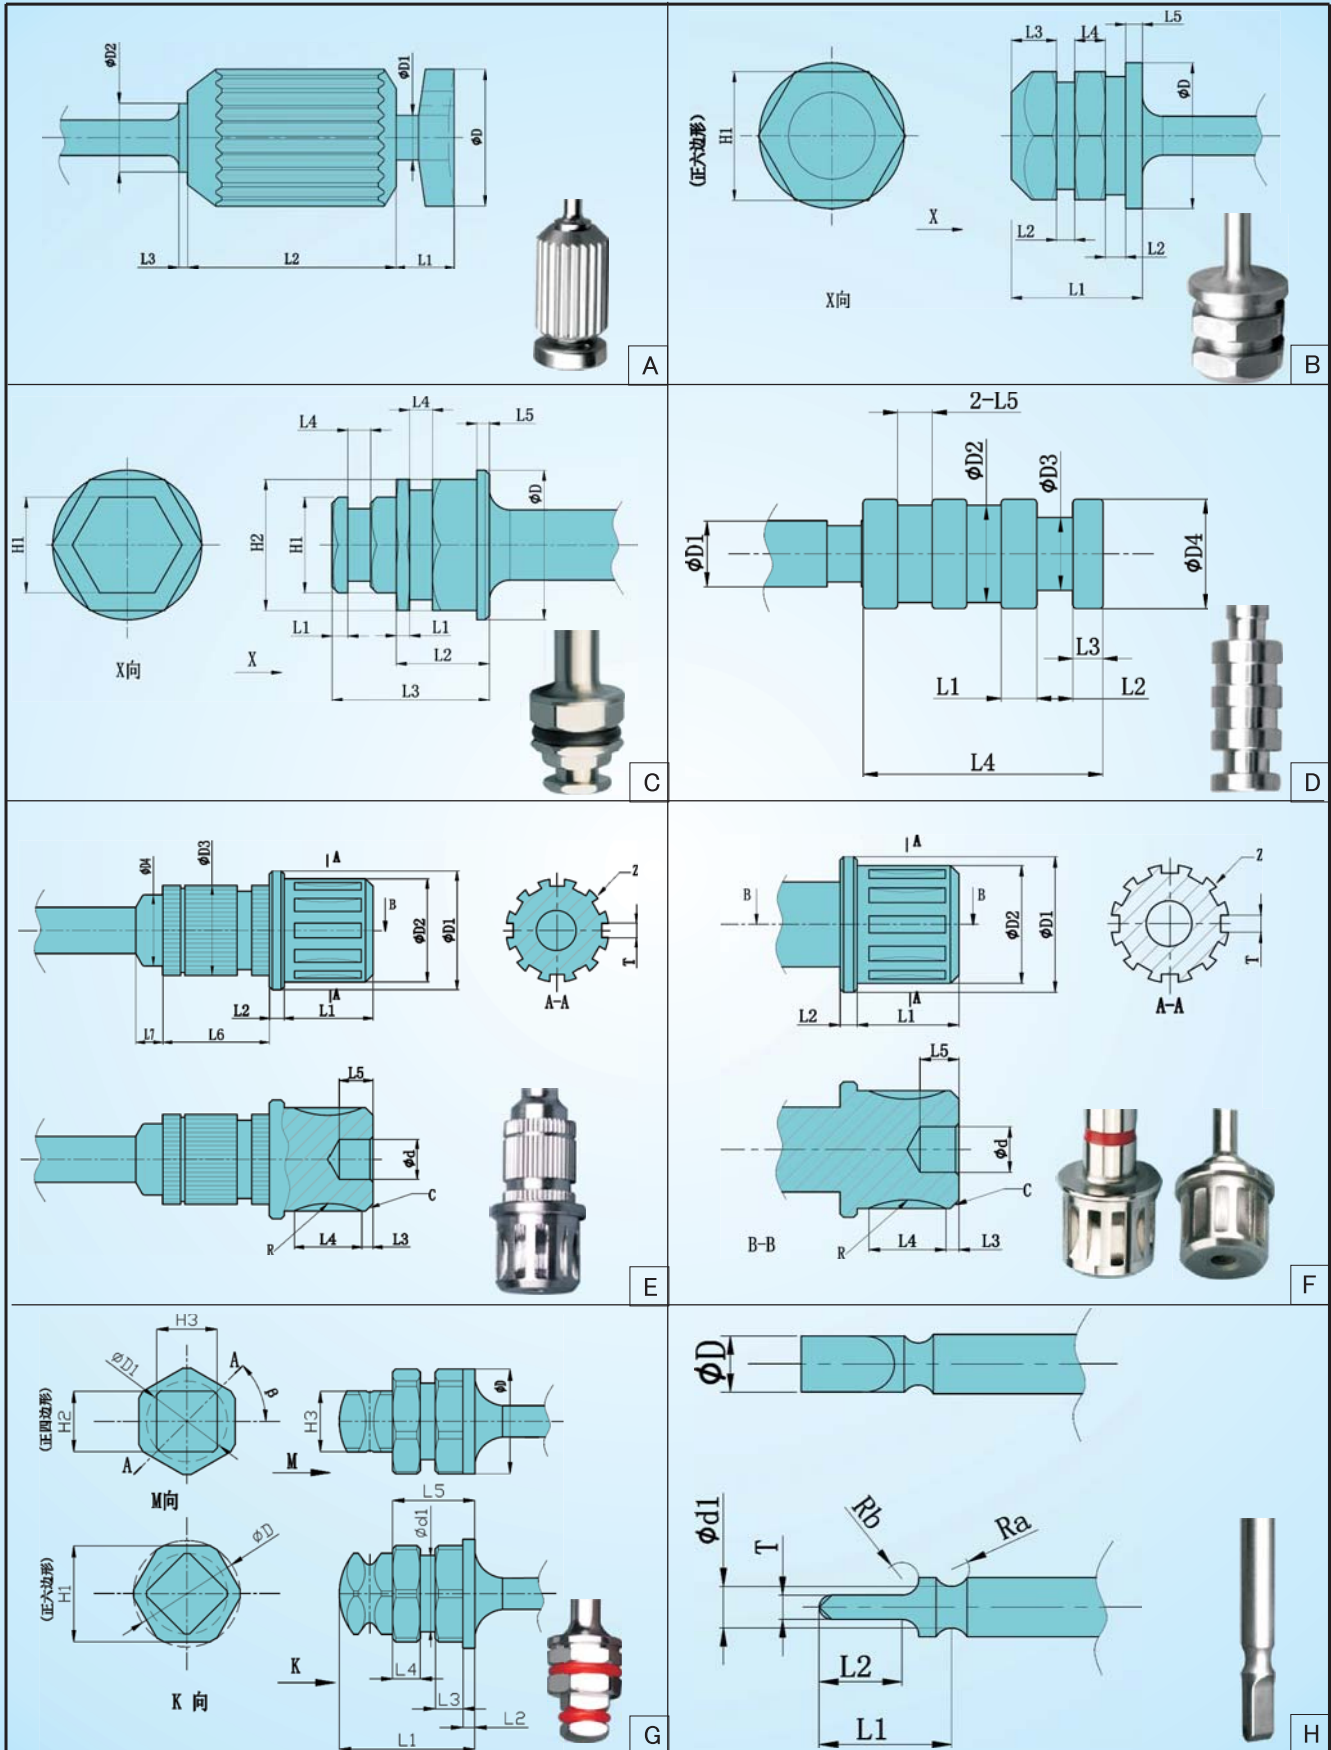

Partial shank types for cutters, accessories(drills/drivers)

刃物、部品(ドリル/ドライバー)の一部柄部タイプ

★、各種鑽頭、鑽套可以採用任意材料及幾何形狀、成型超精、超硬研磨成型

★、All drills and tappers are available in any material ratio of geometrical shape by superfinishing and superhard grinding

超高防銹高硬度型 (AA) & 超高耐磨型 (A/AA) & 超高精密加工  
(Super-high anti-rust and high hardness type(AA)&Super wear-resistant type(A/AA)&Super-high precision process)  
(超高防銹高硬度型(AA)&超耐磨耗型(A/AA)&超精密加工可)

- ★、可以研磨任何的柄部形式、形狀、尺寸、公差、要求等, 只要有CAD圖示樣品, 就可以生產研磨, 有個柄部對應的刀柄適配最好。
- ★、We can grind any shank types, shapes, sizes, tolerances, requirement, etc, only if customers have CAD drawings for sample. Better if with a corresponding cutter holder to match the shank
